

Kisi/Inspextor Integration Guide

This guide provides instruction on how to connect the Kisi access control reader to the Inspextor Platform

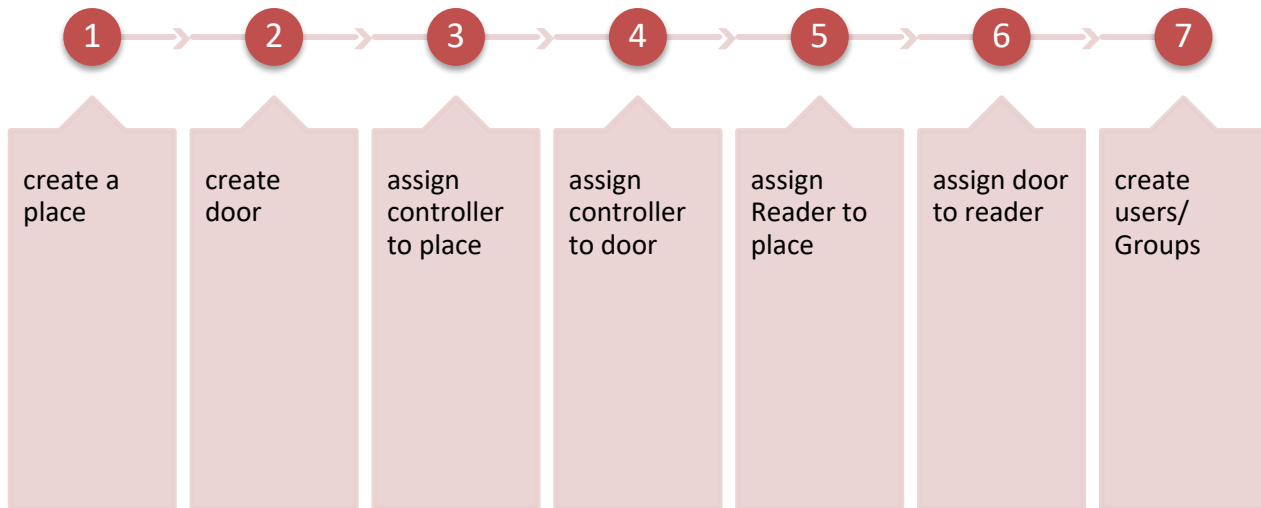

Step 1: Review below wiring diagram and hardware set-up.

Wiring the System

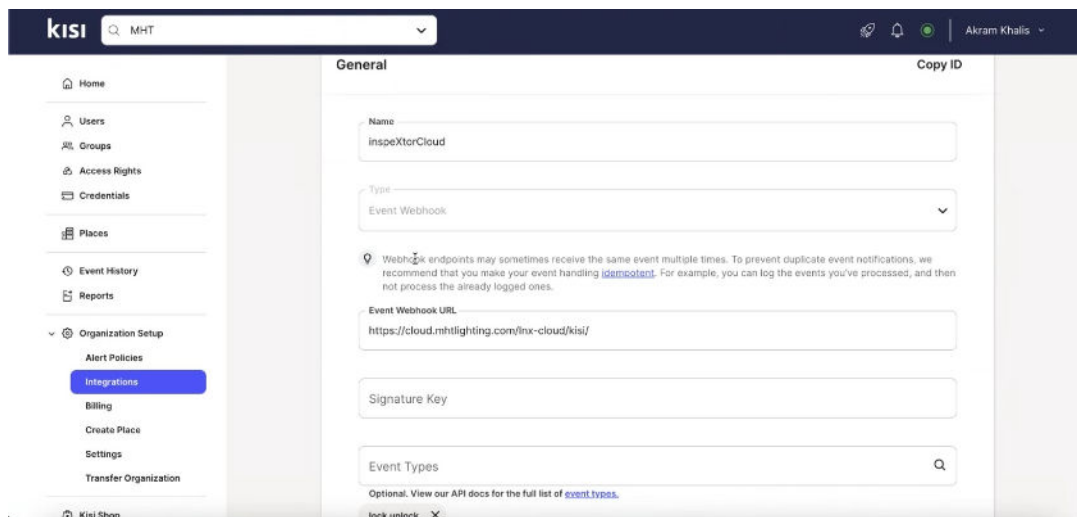

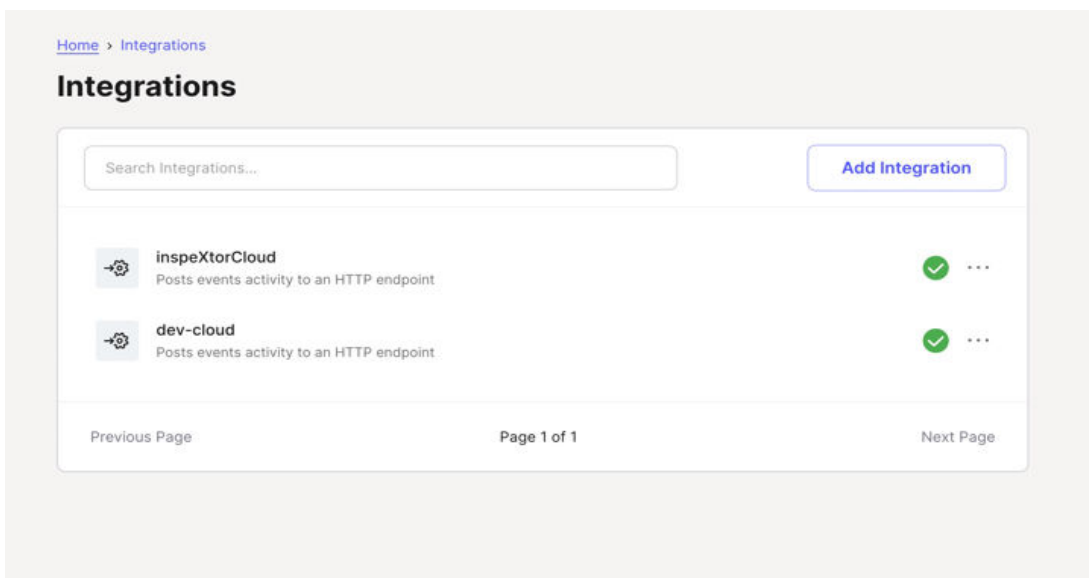

Overview With External Power Supply

Kisi Hardware Set-up

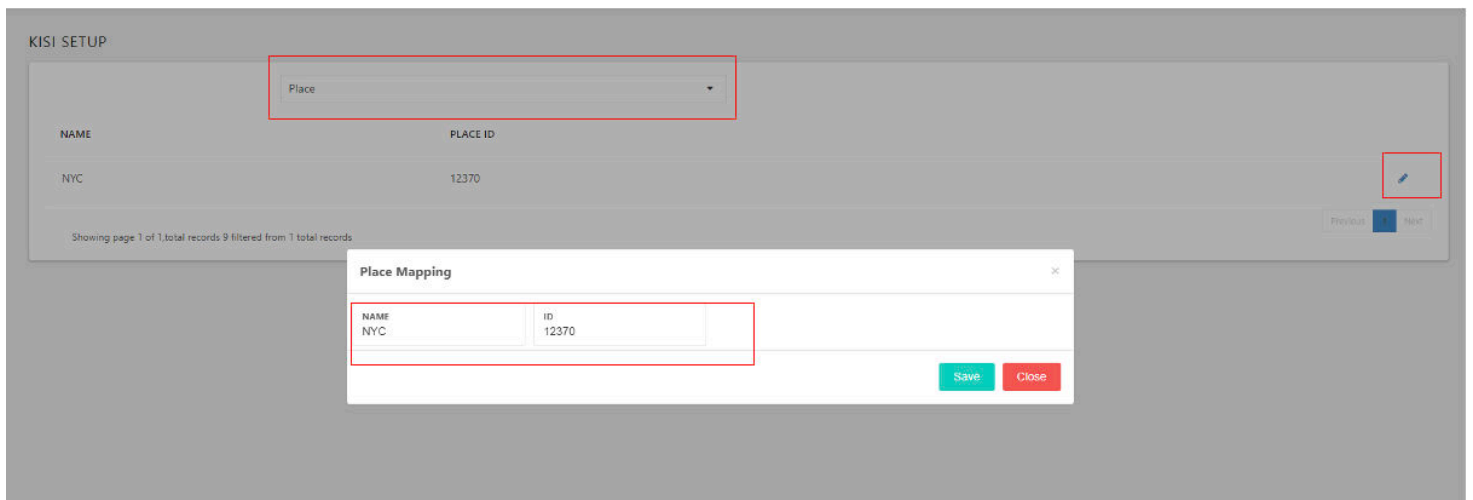

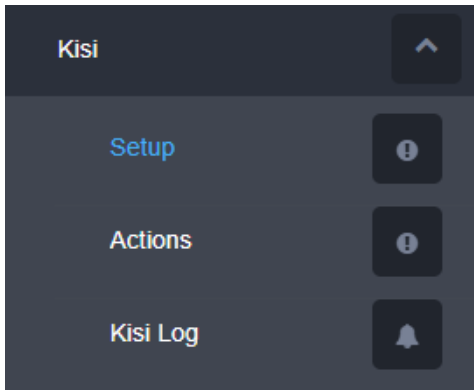

Step 1: Point Kisi to the Inस्पेXtor Platform

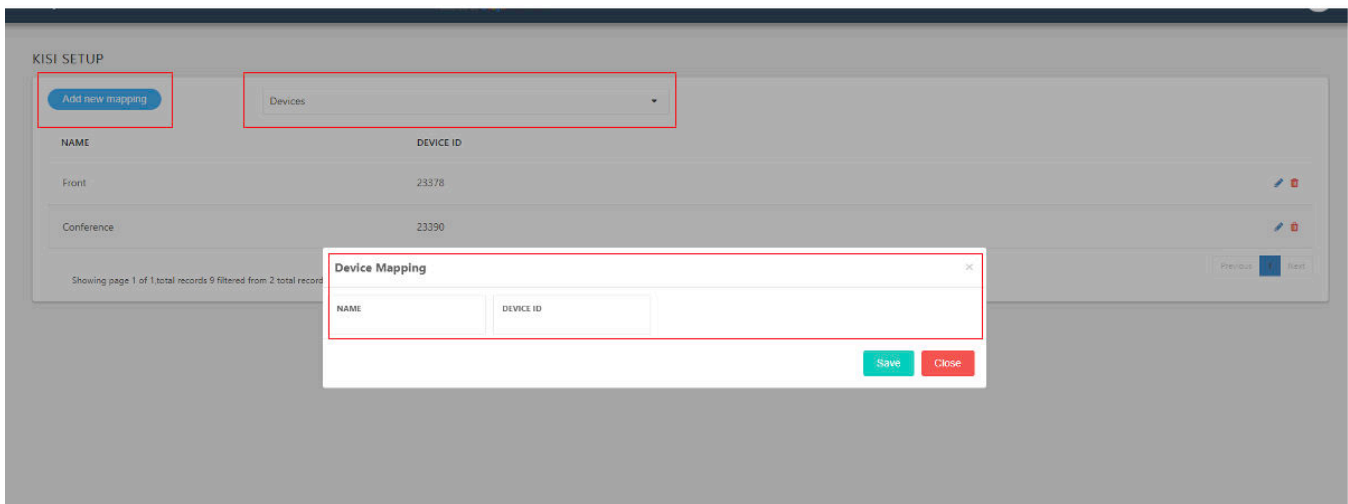

Step 2: Mapping the designated location

- In the Kisi module on Inस्पेक्टर, select “Set-up” and Map the designated Place and hit “Save”

Step 3: Mapping the device

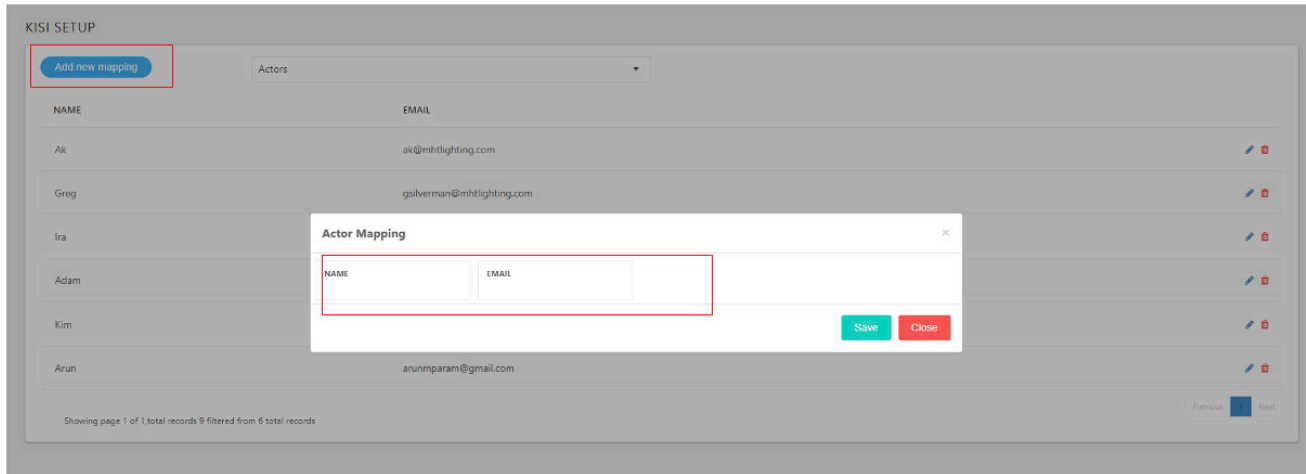

- Select “Add new mapping”
- Select the Device to map
- Once selected, hit “Save”

Step 4: Add Actor Mapping

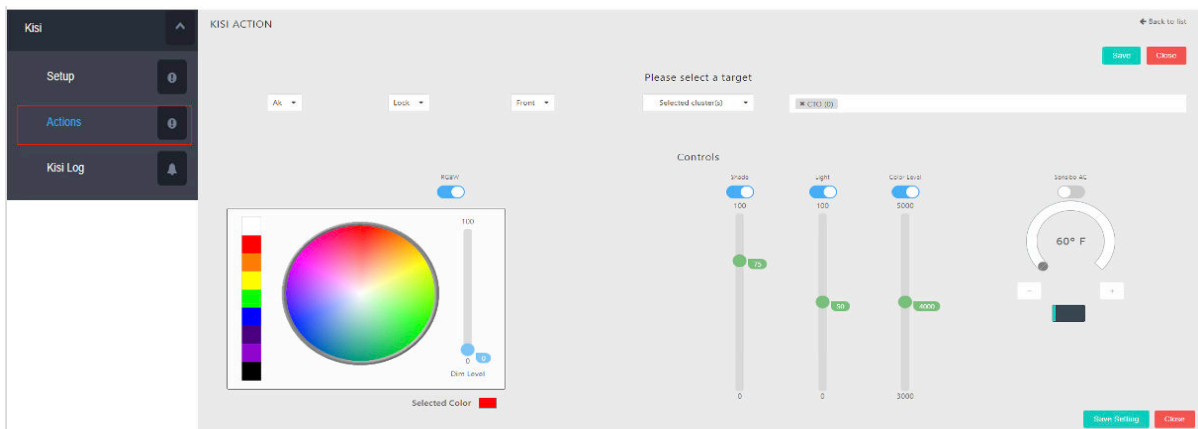

- Select "Add new mapping"
- Select "Actor Mapping"
- Hit "Save"

(Note: you will need to add all users on your Kisi admin account as well as on the Inspextor Kisi set-up page)

Step 5: Create Actions

- Go back to Actions tab in the Inspextor dashboard
- Create the desired Actions
- All saved settings will get displayed under Kisi → Action Page

Edit button is available to edit your settings

You can simulate the Kisi action using this simulate button
